FOREWORD

This Technical Education, Vocational and Entrepreneurship Training (TEVET) Prospectus builds on initiatives that the Government of the Republic of Zambia has undertaken in the TEVET Sector since 2002. These initiatives have been premised on the following skills development objectives:

- Improved demand-responsiveness of TEVET
- Improved quality of training
- Equity in the provision of training
- Improved access to training
- Sustainability of the TEVET system

The challenge for TEVET is how to provide opportunities and diversity of training pathways in order to accommodate the increasing number of school-leavers, as well as existing out-of-school youth. Some options may involve the following:

- (a) increasing the capacity of training institutions to accommodate increasing numbers of learners. This option will require significant investments in physical infrastructure and training facilities;
- (b) promotion of greater private sector involvement and investment in the skills development process;
- (c) promotion of diversified learning pathways, including distance, informal and work-based learning;
- (d) Provision of assessment and qualifications systems that recognize current competencies and prior learning.

This TEVET Prospectus has been designed to provide information on the opportunities for skills development in TEVET. This information is intended for Learners, Parents, Employers, Government Ministries and Agencies, and all other Stakeholders and Partners of the TEVET Sector.

3.0 LIST OF REGISTERED INSTITUTIONS BY PROVINCE AND BY GRADE

The GRADE of a Training Institution is a measure of Quality of Training provided by that Training Institution. The Grade is determined by considering the following quality elements in the provision of training:

- (i) Management staff of the institution (qualifications and experience)
- (ii) Training environment, i.e. physical infrastructure like buildings, libraries, laboratories, workshops, hostels, lecture rooms, etc.
- (iii) Trainers or lecturing staff (qualifications and experience)
- (iv) Ratio of trainers to students
- (v) Training equipment, tools and materials
- (vi) Curricula in use
- (vii) Assessment of learner performance

| Grade | Interpretation |
|-------|--|
| 1 | Very good institutions in terms of management, staff, facilities etc. Very few weaknesses identified. |
| 2 | Good institutions with a lot of basic quality training requirements in place but have some problems in management or trainers or facilities. There are more strengths than weaknesses but with certain critical areas requiring attention. |
| 3 | Institutions with a mixture of strengths and weaknesses in the above-named quality elements. They barely meet the minimum training standards. |
| Note | Institutions graded below Grade Three are not registered. |
| Level | This is the highest level of training an institution is authorised to provide. |
